-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Taunay (U. S. Patent no. 4,679,841).

Taunay discloses:

Vehicle closure member 1, Arm 9 with first segment between pivot point 8 and pivot point 19 and second segment between pivot point 13 and pivot point 19, extension member 12, gas spring 5 with two segments, hinge assembly 3, roller 17

Taunay discloses biasing the roller against the vehicle closure member in column 2 lines 55-58.

The second segment is directly in contact with the closure member through intermediate parts in the exact same way as the instant invention (roller is between the closure member and the second segment of the arm).

Regarding claims 18 and 19, examiner refers to the following figure

The two segments extend in opposite and parallel directions along the y axis in the exact same way that the instant invention does. The instant invention is not a straight bar but is a "W" shape. The legs of the segments extend in both the x and y directions in the same way as the link of Taunay.

Regarding claims 4, 13, 22, an extension member 12 extends transversely to the second segment.

Regarding claims 5, 14, and 21, the moment arm 13-19 is longer than the moment arm 8-19 as can be seen in figure 2. Examiner additionally notes that Applicant admits that the length of the moment arm is merely a design choice based on environmental factors

(Paragraph 18 "Therefore, location of the pivot 22 relative to the hinge axis 44 is dependent on application specific parameters, such as member weight and size.").

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on 571 272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
